Allowable Subject Matter

1. Claims 1-25 are allowed. The following is a statement of reasons for the indication of allowable subject matter:
2. The prior art of record Sugata [US 2002/0037096 A1] teaches: acquiring the surface image of a moving coin through a coin passage, projecting light onto the coin, and capturing the reflected light with a sensor. Sugata further includes analog to digital conversion of the signal, extracting threshold calculation ranges, locating the center of the coin, and binarizing detected pattern data. However, Sugata goes on to discriminate the denomination of a coin through methods and devices concerning the density histogram of the obtained image. Sugata has no provisions for detecting the damage level of a coin.
3. The prior art of record fails to teach: A method of discriminating the damage level of a coin by producing reference bright portion and reference dark portion pattern data from binarizing the detected pattern data, extracting bright portion pattern data and dark portion pattern data consisting of pixels corresponding to pixels in the reference bright pattern data and reference dark pattern data, averaging the bright and dark signal intensity values, calculating the difference between those bright and dark signal intensity average values, and comparing the difference with a predetermined threshold value. The prior art of record also fails to teach an apparatus that performs said method to the upper and lower surface of a coin. For these reasons, claims 1 and 7 are deemed to be allowable over the prior art of record, and claims 2-6 and 8-25 are allowable by dependency.
